

Project Design Phase

Problem – Solution Fit Template

Date	27 June 2026
Team ID	SWTID-2026-4616
Project Name	Visualization Tool for Electric Vehicle Charge and Range Analysis
Maximum Marks	2 Marks

Problem – Solution Fit Template:

The Problem-Solution Fit simply means that you have found a problem with your customer and that the solution you have realized for it actually solves the customer's problem. It helps entrepreneurs, marketers and corporate innovators identify behavioral patterns and recognize what would work and why

Purpose:

- ☐ Solve complex problems in a way that fits the state of your customers.
- ☐ Succeed faster and increase your solution adoption by tapping into existing mediums and channels of behavior.
- ☐ Sharpen your communication and marketing strategy with the right triggers and messaging.
- ☐ Increase touch-points with your company by finding the right problem-behavior fit and building trust by solving frequent annoyances, or urgent or costly problems.
- ☐ Understand the existing situation in order to improve it for your target group.

Template:

Define CS & Value CC	1. CUSTOMER SEGMENTS CS - Electric vehicle customers - Automobile data analysts - EV manufacturers - Charging infrastructure planners	6. CUSTOMER CONSTRAINTS CC - Data available in multiple sources - Difficult to analyze large datasets manually - Limited interactive visualization - Lack of a centralized analytics platform	5. AVAILABLE SOLUTIONS AS - Manual comparison websites - Individual automobile portals - Raw EV datasets - Static reports and spreadsheets	Design AS, differentiate
	2. JOBS-TO-BE-DONE / PROBLEMS JBP - Analyze EV market information easily - Compare EV brands, price, range and performance - Identify charging station availability - Understand EV efficiency and trends - Make data-driven decisions	7. PROBLEM ROOT CAUSE RC - Information is scattered across multiple sources - Manual data collection takes more time - Lack of interactive dashboards for better insights - Complex data is difficult to interpret - No unified platform for EV analytics	3. BEHAVIOUR BE - Search EV details online - Compare different vehicle models - Check price, range and performance - Look for charging station information - Read reviews and market reports - Use spreadsheets for analysis	
Identify triggers TR & EM	4. TRIGGERS TR - Increasing adoption of electric vehicles - Need for data-driven vehicle selection - Growth of EV market and charging networks - Rising fuel costs and environmental concerns - Government policies and EV promotions	9. YOUR SOLUTION SL Electric Cars Analytics Dashboard integrating MySQL, SQL, Tableau and Flask to provide interactive insights about EV brands, pricing, charging stations, efficiency and performance. It centralizes data, enables easy comparison and helps users make informed decisions through visual analytics.	8. CHANNELS OF BEHAVIOUR CH - Web applications - Tableau dashboards - Online analytics platforms - Social media and automotive forums - Industry reports and publications	Select channels to trigger CH & SL
	8. EMOTIONAL RESPONSE / AFTER EM - Confident decision making - Easy understanding of EV data - Saves time and manual effort - Better planning for EV adoption - Satisfaction from accurate insights		10. SOLUTION BENEFITS SB - Centralized EV analytics platform - Interactive dashboard visualization - Faster EV comparison - Accurate and real-time insights - Better business and adoption decisions
